ASX: KIN

Kin starts extensive Resource drilling program at the Leonora Gold Project

Kin Mining NL (ASX: KIN) is pleased to advise that it has started an extensive infill drilling program aimed at further upgrading the 722,000-ounce JORC Resource at its Leonora Gold Project in WA.

The program is designed to upgrade the Inferred portion of the resources contained in the proposed Leonora Gold Project Mine Plan to the Indicated category.

The expanded Indicated Resource will underpin the Definitive Feasibility Study on the Leonora Project.

The start of the infill drilling program comes as Kin prepares to complete the Pre-feasibility on Leonora.

The 10,000m resource-infill drilling program will focus on the Mertondale, Raeside and Cardinia deposits at Leonora, all of which were part of the Company's Scoping Study (see ASX announcement 9th May 2016).

A second phase of approximately 7,000m of RC drilling, in conjunction with diamond drilling for metallurgical and geotechnical purposes, is being devised. A diamond rig and second RC rig is planned to arrive on site as soon as practicable.

About Kin Mining NL

Kin Mining (ASX: KIN) is an emerging gold development company with a significant tenement portfolio in the Eastern Goldfields of Western Australia. Through exploration success and selective acquisition, the Company aims to become a profitable, high-margin, low cost Australian gold producer. The immediate focus of the Company is completing an updated pre-feasibility study at its flagship Leonora Gold Project (100%), containing a JORC resource of 722koz¹, by the end of the calendar year.

Kin's exploration is targeting near-mine and prospects within the transport corridor linking further discovery to a proposed independent processing plant located at the Leonora Gold Project. Kin aims to fund its regional exploration within its extensive and highly prospective project portfolio with an ongoing focus of limiting dilution.

¹(ASX announcement 15 May 2015 - JORC 2012 Leonora Gold Project Resource Estimation. Following Trial mining at the Lewis deposit in July 2016 an estimated 1,000oz has now been depleted)

Competent Persons Statement

The information contained in this report relates to information compiled or reviewed by Paul Maher who is a member of the (AusIMM) and Mr. Simon Buswell-Smith who is a Member of the Australian Institute of Geoscientists (MAIG), both are employees of the company and fairly represents this information. Mr. Maher and Mr. Buswell-Smith have sufficient experience of relevance to the styles of mineralisation and the types of deposit under consideration, and to the activities undertaken to qualify as a Competent Person as defined in the 2012 edition of the "JORC Australian code for reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr. Maher and Mr. Buswell-Smith consent to the inclusion in this report of the matters based on information in the form and context in which it appears.

Forward Looking Statements
