

FIRST GOLD POUR AT LEONORA GOLD PROJECT

Kin Mining NL (ASX: KIN) today announced it has poured the Company's first gold from its flagship 100%-owned Leonora Gold Project (LGP) in the Eastern Goldfields of Western Australia (Figure 1).

This production milestone is part of the Company's trial mining program at the Lewis deposit, located within the 193,000oz Cardinia oxide resource camp at the LGP (Figure 2).

Two gold pours have been completed to date at the Lakewood toll milling facility in Kalgoorlie. Approximately 15,000t of ore was mined, trucked, and toll milled in Kalgoorlie, the third and final pour is expected this week.

Kin Mining Executive Director, Mr Trevor Dixon, said today's achievement not only demonstrated the Company's ability to take a trial project from design, permitting, mine development, through to the production of bullion but also further de-risked the LGP.

"This is a major step forward on Kin's path to commercial production," said Mr Dixon. "Albeit a smaller scale, the principles remain the same in terms of the future development of the LGP."

The aim is for the Cardinia oxide resource to provide the base load mill feed for a proposed standalone, centrally located, processing plant.

The overall objectives of the Lewis trial mining project in terms of the updated PFS at the LGP is as follows:

- To visually observe the structural controls on the mineralisation within the open pit;
- to determine realistic modifying parameters to apply to move from resource to reserve;
- to determine the optimal geotechnical parameters;
- reagent consumption rates
- gain understanding of soft oxide materials handling through the mill;
- verify ore grades;
- verify total gold recovery;
- verify the bulk density used in the Cardinia JORC 2012 resource estimates; and
- provide bulk samples for low-grade heap leaching testwork.

Once all reconciliations, gold in circuit (GIC), and Perth Mint outturns have been received, the Company will announce the results of the Lewis trial mining project. Kin expects to complete a project evaluation and mine-to-mill reconciliation by mid-September 2016.

About Kin Mining NL

Kin Mining (ASX: KIN) is an emerging gold development company with a significant tenement portfolio in the Eastern Goldfields of Western Australia. Through exploration success and selective acquisition, the Company aims to become a profitable, high-margin, low cost Australian gold producer. The immediate focus of the Company is completing an updated pre-feasibility study at its flagship Leonora Gold Project (100%), containing a JORC resource of 722koz, by the end of the calendar year.

Kin's exploration is targeting near-mine and prospects within the transport corridor linking further discovery to a proposed independent processing plant located at the Leonora Gold Project. Kin aims to conduct its regional exploration programmes within its extensive and highly prospective project portfolio with an ongoing focus of limiting dilution.

* Resource estimate by McDonald Speijers, 2009 with Merton's Reward depleted by McDonald Speijers in 2010.

** Resource estimate by Runge Limited, 2009 with Bruno Grade Control depleted by Runge in 2010.

Notes: Assay top cuts for Mertondale and Raeside are variable but generally between 10-20g/t Au and are 15g/t Au at Cardinia. No allowance has been made for dilution or ore loss. All resources are constrained by open pit shells optimised at A\$2,000/oz.

Competent Persons Statement

The information contained in this report relates to information compiled or reviewed by Don Harper who is a Fellow of the AusIMM, Paul Maher who is a member of the AusIMM and Mr. Simon Buswell-Smith who is a Member of the Australian Institute of Geoscientists (MAIG), all are employees of the company and fairly represents this information. Mr. Don Harper, Mr. Maher and Mr. Buswell-Smith have sufficient experience of relevance to the styles of mineralisation and the types of deposit under consideration, and to the activities undertaken to qualify as a Competent Person as defined in the 2012 edition of the "JORC Australian code for reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr. Harper, Mr. Maher and Mr. Buswell-Smith consent to the inclusion in this report of the matters based on information in the form and context in which it appears.

Forward Looking Statements

Certain information in this document refers to the intentions of Kin Mining NL, but these are not intended to be forecasts, forward looking statements or statements about future matters for the purposes of the Corporations Act or any other applicable law. The occurrence of events in the future are subject to risks, uncertainties and other factors that may cause Kin Mining NL's actual results, performance or achievements to differ from those referred to in this announcement. Accordingly, Kin Mining NL, its directors, officers, employees and agents do not give any assurance or guarantee that the occurrence of the events referred to in this announcement will actually occur as contemplated.
