## **KIN LODGES PHASE 1 WORKS APPROVAL FOR LEONORA GOLD PROJECT**

*Works approval submission supports objective of commencing plant  
construction in December quarter*

Kin Mining (**ASX: KIN**) is pleased to advise that it has lodged the approval documentation for Phase 1 of its 100% owned Leonora Gold Project located in the North-Eastern goldfields of Western Australia, marking another important step in its progress towards development and production.

A Mining Proposal been lodged with the Department of Mines, Industry Regulation and Safety (DMIRS) and a Works Approval has been lodged with the Department of Water and Environmental Regulation (DWER).

The Phase 1 documents seek approval to construct the Leonora Gold Project processing plant and related infrastructure to dry commissioning in advance of the lodgement of complete operational approvals in Phase 2 for the mining and processing activities.

Kin reached agreement with the regulators to conduct a phased approval process to allow the processing plant to commence construction earlier than would have been possible if it had to wait for final project mining parameters.

Kin's Managing Director, Don Harper, said the lodgement of the Works approval marked another important step in the Company's progress towards production.

"We are continuing to make rapid progress on multiple fronts and need to stay ahead of the game," he said. "We are embarking on a period of strong news-flow over coming weeks, with our LGP Resource Update, Definitive Feasibility Study and maiden Ore Reserve all to be completed this quarter. Exploration drilling is set to recommence next month on a number of walk-up high grade drill targets."

## **About Kin Mining**

**Kin Mining NL (ASX: KIN)** is an emerging gold development company with a significant tenement portfolio in the North-Eastern Goldfields of Western Australia. The immediate focus of the company is development of the (100% Kin), Leonora Gold Project.

Kin's priority is to complete a Feasibility Study for the LGP during the September 2017 quarter. Drilling is complete with updated Mineral Resources expected in the September 2017 quarter. Metallurgical, geotechnical, and environmental field work is now complete in support of the Definitive Feasibility Study, which will form the basis for a decision to mine.
