Kin commences site development activities at the Leonora Gold Project

Figure 1. Clearing of the Leonora Gold Project processing plant site

Kin Mining (**ASX: KIN**) is pleased to advise that it has commenced site activities at its 100% owned Leonora Gold Project (LGP) located in the North-Eastern goldfields of Western Australia.

Clearing, de-grubbing and stockpiling of topsoil within the approved processing facility boundary has commenced. The works have been undertaken by SMS Innovative Mining Solutions, a well recognised mining services contractor operating in the Leonora area.

Upgrading of the existing gravel access roads from the Leonora-Laverton highway to Cardinia is underway to ensure the process plant construction materials and equipment can be reliably delivered.

Managing Director Don Harper said,

"We are now actively operating on the ground which is extremely rewarding for the team. We have come a long way in a very short period of time. This is a very exciting time for our staff and shareholders as we develop the Leonora Gold Project. Having the approvals in place and the commencement of site development works is a significant step towards our goal to produce gold this year."

About Kin Mining

Kin Mining (ASX: KIN) is an emerging gold development company with a significant tenement portfolio in the highly prospective North-Eastern Goldfields region of Western Australia. The Company has completed its Definitive Feasibility Study on the Leonora Gold Project forecasting an average production rate of 55,000oz¹ pa. The Company has also upgraded its resources to 1.02Moz² and released its Maiden Ore Reserve of 373,000oz¹. Kin is seeking to increase shareholder value through continued aggressive exploration on its tenements and achieving gold production in the second half of 2018.

¹The 2 October 2017 DFS included the proposed 3.75% West Australian Government Gold Tax. This proposal has since been rejected with the revised AISC now A\$1,018/oz. The Company confirms that it is not aware of any new information or data that materially affects the information included in the ASX announcement of 2 October 2017 "Feasibility confirms a high margin gold mine for Kin at its Leonora Gold Project", and that all material assumptions and technical parameters underpinning the estimates in that announcement continue to apply and have not materially changed. For Reference see ASX Announcement 2/10/2017 *Feasibility confirms a high margin gold mine for Kin at its Leonora Gold Project*

²The Company confirms that it is not aware of any new information or data that materially affects the information included in the ASX Announcement of 30 August 2017 "Kin Defines +1 Million ounces of Gold at the Leonora Gold Project", and that all material assumptions and technical parameters underpinning the estimates in that announcement continue to apply and have not materially changed.
