Placement and Appendix 3B

Kin Mining NL (ASX: KIN) is pleased to advise that it has completed a placement to Sophisticated and Professional Investors pursuant to s708 of the Corporations Act raising \$750,000 from the issue of 3,750,000 at \$0.20c to assist the company with its ongoing development strategy at the Leonora Gold Project prior to the dispatch and finalisation of the Share Purchase Plan (SPP) to existing eligible shareholders.

At its Annual General Meeting held on 28 November 2016 the Company received shareholder approval for a future issue of up to 5,000,000 shares. The approval was valid for a period of 3 months and the issue of shares would be at the Directors discretion. The Company has taken the opportunity to utilise the approval and obtain interim funding without affecting its current placement capacity.

The placement has been done on the same terms as the SPP with the shares being issued at \$0.20c with a 1 for 2 attaching option exercisable at \$0.40c expiring two years from the date of issue. The issue of the options is subject to shareholder approval and the Company is currently finalising a Notice of Meeting to obtain the necessary approvals.

About Kin Mining

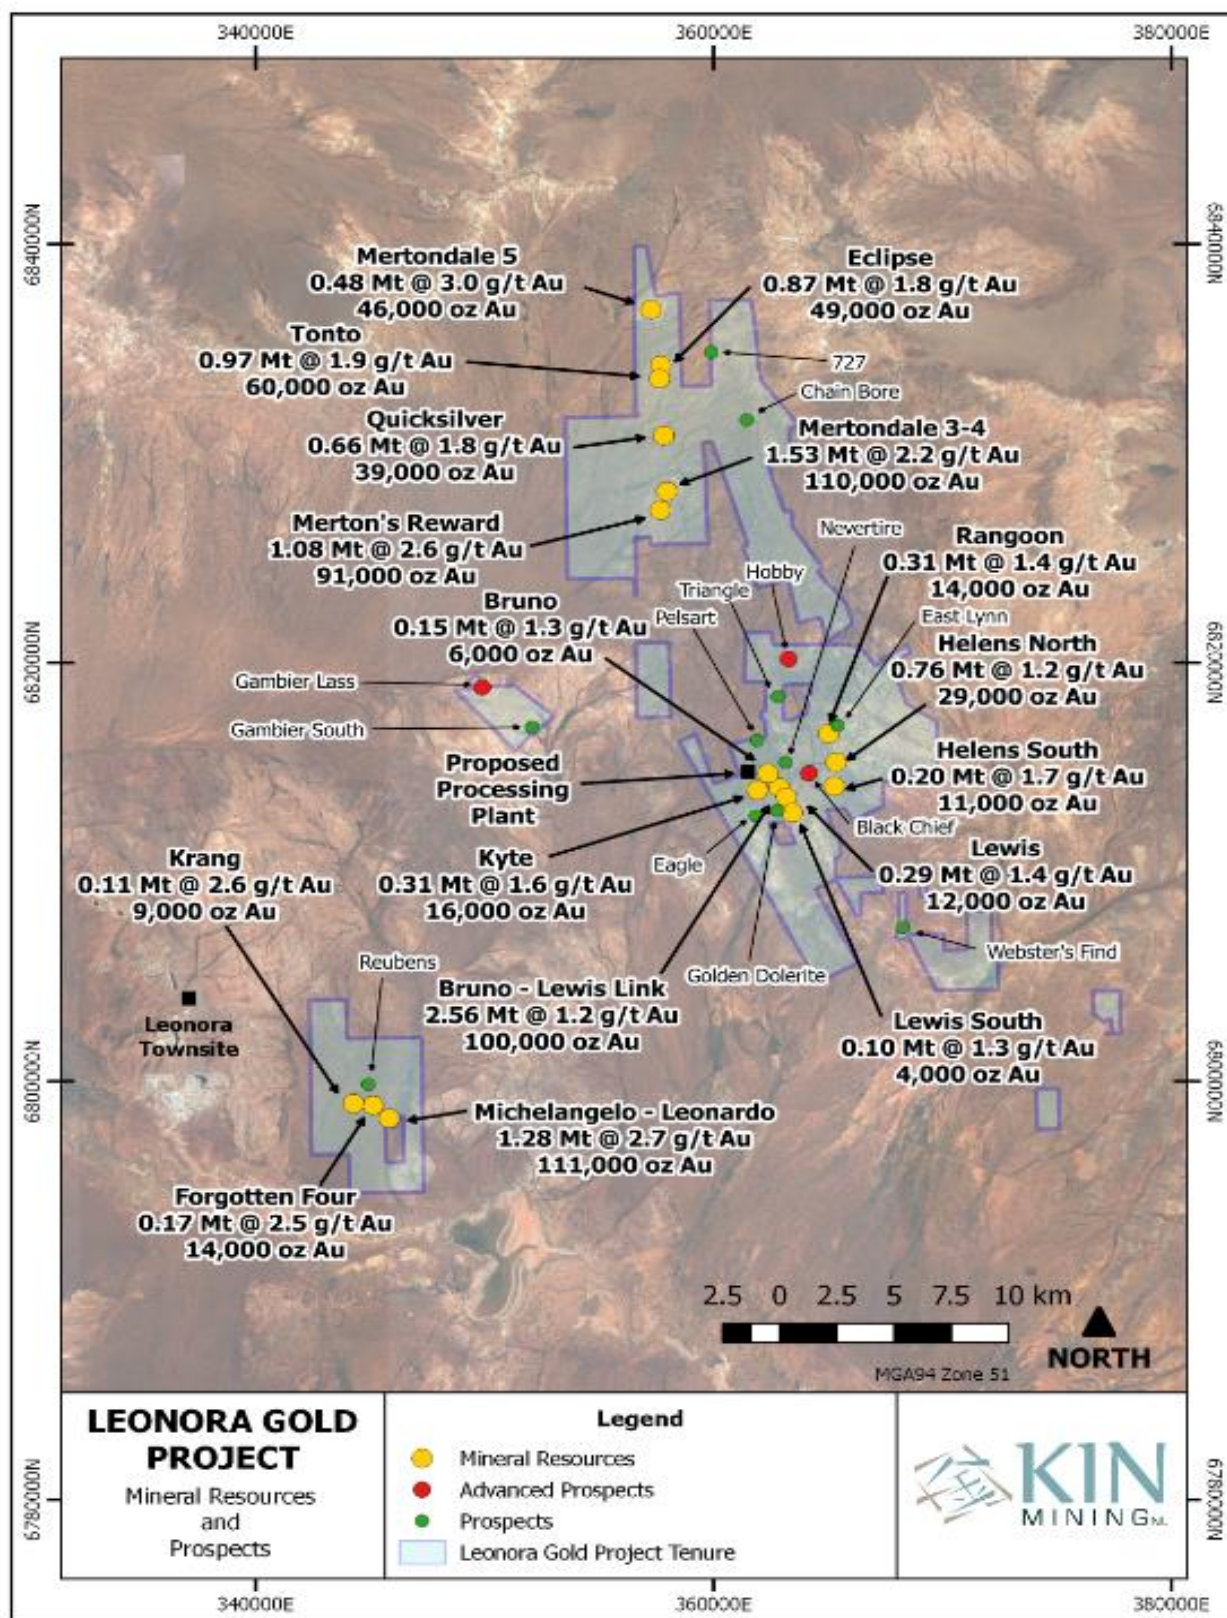

Kin Mining NL (ASX: KIN) is an emerging gold development company with a significant tenement portfolio in the North-Eastern Goldfields of Western Australia. The immediate focus of the company is the (100% Kin), Leonora Gold Project (LGP) which contains a JORC resource of 721 koz Au. The outcomes of the Pre-Feasibility Study at the LGP, confirmed the potential for Kin to become a low-risk, high-margin gold producer. Gold production is targeted for mid-2018.

Please refer to the announcement dated 15 December 2016 titled "PFS Confirms Leonora Gold Project as a High Margin Project". Furthermore the Company confirms in accordance with the PFS announcement lodged on 15 December 2016 that all the material assumptions underpinning the annual production targets as provided in that Report continue to apply and have not materially changed.

The Project has forecast production of approximately 50,000 oz Au per annum, once established, over an initial 6.5-year mine life. Mining will be undertaken at 3 open pit mining centres, feeding a new 750 ktpa conventional carbon-in-leach processing plant, to be located at Cardinia. The plant is scheduled to be upgraded to 1.2 Mtpa in Year three. A total of 6.8 Mt of ore grading 1.5 g/t Au are scheduled to be processed over the life of the operation, yielding 309 koz of recovered gold. There is significant exploration upside in the Project area, which may increase the lifetime of the Project.

The robust economics of the Project are underpinned by a low pre-production capital cost, of only A\$35M (including 15% contingency), and an operating cash flow of A\$105M. The capital payback period is notable at only 18 months from first gold production, which demonstrates the low risk, high margin profile of the operation. The life-of-mine All In Sustaining Cost (AISC) is projected to be A\$1,084 / oz Au. The Pre-Feasibility Study also identified several areas where opportunities exist to improve the economic and operational performance of the Project, such as securing a good quality second-hand processing plant, improving metallurgical recoveries, and further optimisation of mine designs.

Kin's priority is to complete a Feasibility Study for the LGP by mid-2017. Drilling is in progress with the objective of converting the Inferred Mineral Resources in the mine plan to Indicated Mineral Resources. Metallurgical, geotechnical, and environmental work is scheduled or currently underway to support the DFS, which will form the basis for a decision to mine.
